

ECONOMIC PARTNERSHIP AGREEMENTS IN AFRICA: A BENEFIT-COST ANALYSIS

SYNOPSIS

This study provides a simple cost-benefit analysis of the Economic Partnership Agreements (EPAs) between African countries and the European Union. It compares the costs of signing an EPA - measured as tariff revenue losses, versus the “gains” of signing an EPA - measured as duties African countries would *avoid* paying if they were to export to the EU market under the EU’s Generalised System of Preferences (GSP) scheme. The major question therefore is whether the tariff revenue losses resulting from the EPA outweigh the duties that countries would have to pay in a non-EPA scenario? **Do the losses of EPAs outweigh the “gains”?**

The paper shows that even with this simple cost-benefit analysis (looking only at one dimension of the costs), for most African countries, the tariff revenue losses are higher than the duties at the EU border if there is no EPA. **The costs of an EPA are therefore greater than the gains!** These countries include all African LDCs, and non-LDCs: Congo, Cote d'Ivoire, Cameroon, Gabon, Ghana, Kenya and Nigeria.

It should be noted that from a market access perspective, LDCs only incur losses under an EPA. The EU’s Everything But Arms (EBA) already provides for duty-free and quota-free market access for virtually all products. On the other hand if they sign the EPAs, there are significant tariff revenue losses for them.

I. INTRODUCTION

1. Negotiations on the Economic Partnership Agreements (EPAs) between Africa and the European Union (EU) have been dragging on for years. Most African countries have not been enamored by the implications of widespread tariff elimination and other conditionalities that would be imposed on them. However, negotiations are still continuing in some form or other because many want to avoid the prospect of having a less preferential trading regime with the European Union as compared with what they had under the Cotonou Agreement.
2. In this Note we compare the benefits of signing an EPA with the costs of signing an EPA for African countries. The paper focuses on comparing the main 'benefit' versus one of the main losses countries would experience from implementing an EPA. Even this simple analysis already provides revealing results.
3. The benefit of an EPA is additional market access compared with the trading arrangement that could be applied in the absence of an EPA. This could be measured by calculating the duties that might be paid each year under EU's Everything But Arms scheme (for LDCs) or EU's GSP (for non-LDCs) in the absence of an EPA. (LDCs will face no additional duties without an EPA, hence they lose by signing EPAs).
4. The cost of an EPA is measured as the yearly tariff revenue loss as a result of an EPA. There will be other costs involved in signing an EPA – such as industries that could go bust when competing with the EU; new institutions that would have to be put in place to implement the EPA; infrastructure and other costs that would have to be incurred for countries to "survive" in a much more competitive market place. Nevertheless, tariff revenue losses are measurable and immediate. These "costs" are therefore underestimates of the real costs of an EPA.

Table 1: Benefit-cost analysis

Benefit of EPA	Cost of EPA
<ul style="list-style-type: none">• Avoidance of duties for African exports to the EU compared with the trading arrangement without an EPA (EU GSP or EBA)	<ul style="list-style-type: none">• Tariff revenue loss as a result of EPA

5. It should be noted that the “benefit” of the EPA (as defined in this paper) of duties that will not be charged for African exports will accrue to the African exporters. However, the costs of the EPA – tariff revenue loss – will be costs borne by African government, and the people affected by cuts in government incomes.

II. THE BENEFITS OF SIGNING EPAS: NOT PAYING DUTIES AT EU BORDER

6. From a market access perspective, the benefit of signing EPAs is the additional market access to the EU compared with trading arrangement under the GSP (for non-LDCs) or the EBA (for LDCs). The benefit of signing EPAs differs per country or country group:
7. **Least Developed Countries (LDCs).** For LDCs the additional benefit of an EPA is nil with respect to market access in goods. LDCs can already avail of Duty Free Quota Free (DFQF) market access under the EU’s Everything But Arms (EBA) scheme.
8. **South Africa** trades under a reciprocal free trade agreement with the EU - the Trade, Development and Cooperation Agreement (TDCA). The TDCA provides for the liberalisation of 95% of the EU's imports from South Africa.¹ For South Africa, the EPA potentially provides only an incremental benefit in terms of market access, whilst there are other costs in terms of more conditionalities in the EPA as compared to the TDCA.
9. We exclude South-Africa from the cost-benefit analysis. Like in the case of LDCs, the country has little to gain from signing an EPA as the additional market access under an EPA is minimal. On the other hand, South Africa already incurred tariff revenue losses under the TDCA. Up to now, the country has opted out of signing the EPA because of costs other than tariff revenue losses e.g. MFN clause, the EU’s insistence to include services and the reluctance of the EU to align the SADC EPA with the TDCA (which would mean delaying South Africa’s liberalization commitments for some products).
10. **Non-LDCs other than South Africa.** At present, ten African non-LDCs enjoy Cotonou Agreement-equivalent preferences under the EU’s non-reciprocal Market Access Regulation 1528/2007.² They are: Botswana, Cameroon, Cote d’Ivoire, Ghana, Kenya, Lesotho, Mauritius, Namibia, Seychelles, Swaziland and Zimbabwe. The EU has proposed that this regulation expires by January 2014. Moving these countries to an EPA arrangement will mean that the status quo in duty free access to the EU market will

1 http://europa.eu/legislation_summaries/development/south_africa/r12201_en.htm

2 Council Regulation (EC) No 1528/2007 of 20 December 2007, <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2007:348:0001:0154:EN:PDF>.

continue for these countries. (I.e. there will be no withdrawal of their preferential treatment). Without EPA, these non-LDCs with the exception of South-Africa would fall back to EU's GSP (like Congo and Gabon) and start paying duties at the EU border.

11. **Cape Verde, Republic of the Congo, Gabon, Nigeria**, are not listed as beneficiaries of the EU's Market Access Regulation. Cape Verde has been removed from the list of the LDCs in 2008 but benefits from a transitional period that allows it to still be granted EBA preferences until the end of 2012. After that, it would fall back to EU's GSP. The other three countries have already been trading under GSP since 2008.

III. THE COSTS OF SIGNING EPAs: TARIFF REVENUE LOSS

12. The most measurable and immediate cost of implementing the EPA is the massive loss of fiscal revenues governments will face. Tariffs have always been a major source of government revenue for countries in the process of development. For instance, in the United States, tariffs were the largest source of federal revenue from the 1790s to the eve of World War I, until it was surpassed by income taxes.³
13. This is not different for many African countries today. Earlier we reported that import duties as a share of total tax revenue can be quite high in some developing countries.⁴ For instance, Cameroon's dependency on tariffs is 31.6%, Uganda's share is 50.3% and Swaziland reaches 54.7%.⁵
14. There are several studies that estimate tariff revenue losses of African countries if they sign an EPA. However, they focused mostly on individual countries or countries within a particular region and did not look at all individual African countries negotiating EPAs.
15. The most comprehensive study is a 2005 UN Economic Commission for Africa (UNECA) report which examined the economic and social impacts of the trade liberalization aspects of the EPAs. It provides a quantitative assessment of the likely implications of the EPAs, including tariff revenue implications. To date this is the only study that has tariff

³ http://en.wikipedia.org/wiki/Tariffs_in_United_States_history

⁴ South Centre Analytical Note SC/TADP/AN/MA/1, "Revenue implications of WTO NAMA tariff reduction".

⁵ For Swaziland, see also the Swazi Observer, 6 June 2011, "50% govt revenue from international trade tariffs", <http://www.observer.org.sz/index.php?news=25669>

revenue loss figures for all African countries using the same method (with the exception of Cape Verde).⁶

16. As already noted above, besides tariff revenue loss, there are other costs incurred when EPAs are signed. First, they are reciprocal free trade agreements obliging African countries to lower applied tariffs. They limit the flexibility to raise tariffs in the future when needed. This will have wide-ranging implications on African countries' domestic industries and agricultural sectors. Second, the EPAs include the Most Favoured Nation (MFN) clause which would constrain Africa's ability to conclude agreements with countries like Brazil, Russia, China and India. Such costs are not factored into our analysis.

IV. COMPARING BENEFITS AND COSTS: AN ANALYSIS OF AFRICAN NON-LDCS EXCEPT SOUTH-AFRICA

17. This Note compares

- the additional duties that a country would not have to pay trading under an EPA (benefit of EPA) with
- tariff revenue losses as a result of an EPA (cost of EPA).

18. When a non-LDC country does not sign the EPA, we assume in this simulation that it would fall back to the EU's GSP trading arrangement and, as a consequence, its exports would be subject to GSP duties.⁷ All LDCs would continue to trade with the EU duty-free under the EBA.

Calculation of duties payable under EU GSP ("benefit of EPA")

19. For non-LDCs, in the absence of an EPA, how are the duties payable under EU's GSP calculated? We look at the Top-30 exports of each African non-LDC in the period 2008-2010 and retrieved the corresponding EU GSP duty.
20. **Top 30 African exports to EU.** It is a well-known fact that most African countries export a relatively undiversified basket of products to the EU. In all non-LDCs, the thirty most important exports to the EU constitute more than 90% of total exports to the EU, with Botswana, Congo, Gabon, Nigeria, Seychelles and Swaziland reaching 98% or more. The

⁶ UNECA, African Trade Policy Centre, Work in Progress no. 10, March 2005, Economic and Welfare Impacts of the EU-Africa Economic Partnership Agreements", <http://www.uneca.org/atpc/Work%20in%20progress/10.pdf>

⁷ Congo, Gabon and Nigeria are already under GSP.

only exception is Mauritius (79%), due to the fact that textile tariff lines are extremely specific in the EU's tariff schedule.

Table 2: Coverage Top30 export products to EU in 2010

Country	Total exports	Goods registered under Chapter 99 of the nomenclature	Total exports under Chapter 1 to 97	Top 30 exports	Coverage (E/D)
A	B	C	D	E	F
Botswana	837.79	0.48	837.31	836.3	99.9%
Congo	1,492.13	1.11	1,491.02	1,464.1	98.2%
Cote d'Ivoire	3,215.83	3.51	3,212.32	3,064.6	95.4%
Cameroon	2,008.24	0.89	2,007.34	1,959.2	97.6%
Cape Verde	36.21	0.03	36.18	33.7	93.2%
Gabon	858.60	2.11	856.49	840.3	98.1%
Ghana	1,458.81	2.54	1,456.26	1,354.9	93.0%
Kenya	1,111.04	2.63	1,108.42	1001.2389	90.3%
Mauritius	882.12	0.61	881.51	696.2	79.0%
Namibia	1,160.06	0.76	1,159.30	1,120.7	96.7%
Nigeria	14,634.52	7.72	14,626.80	14,406.1	98.5%
Seychelles	167.71	0.15	167.56	165.0	98.5%
Swaziland	157.00	0.11	156.89	153.8	98.0%
Zimbabwe	298.11	0.38	297.74	285.6	95.9%

Note1: All trade data in EUR million

Note2: Goods registered under Chapter 99 of the nomenclature generally are not charged duties. They include articles declared as supplies or services for ships and aircrafts and returned goods, among others. In the European Union, chapter 98 is only used for recording exports and arrivals or dispatches of (component parts) of complete industrial plants (Commission Regulations (EU) No 113/2010 of 9 February 2010 and (EC) No 1982/2004 (2) of 18 November 2004). No trade seems to occur between EU and Africa in Chapter 98.

Table 3: calculation of duties payable under EU GSP, sources

Description	Source
Top 30 African exports to EU	<ul style="list-style-type: none"> Eurostat trade data, EU imports from African non-LDCs, 8-digit, 3-year average 2008-2010
Applicable EU GSP duty	<ul style="list-style-type: none"> MFN rates from European Commission, Taxation and Customs Union EU GSP regulation 2009-2011, extended to 2012
Ad valorem equivalents (AVEs) of specific or mixed duties	<ul style="list-style-type: none"> ITC Market Access Map

21. **Applicable EU GSP duty.** The current EU GSP runs from 2009 to 2011 and has been extended to the end of 2013 in the face of EU GSP reform.⁸ The products included in EU GSP have been put in either of these two categories: Non-sensitive (NS) and Sensitive (S).
- Duties on products classified as non-sensitive products are suspended entirely, except for agricultural components.
 - Ad valorem duties on products classified as sensitive products are reduced by 3.5 percentage points. For textiles and textile articles (HS Chapter 50 to 63) this reduction is 20 %. Specific duties on sensitive products are reduced by 30 %. In the case of mixed duties (ad valorem and specific duty) the specific duties are not reduced.
22. Duties are suspended totally if the GSP duty after applying the above rules results in an ad valorem duty of 1% or less or in a specific duty of EUR 2 or less. The reason is that the cost of collecting such duties might be higher than the revenue gained.
23. The product coverage of the new EU GSP proposed by the European Commission is almost the same as the current GSP.⁹ However, the number of eligible countries has been reduced. Countries having high or upper-middle income status during three consecutive years (as classified by the World Bank) would not be eligible for EU GSP. In Africa, the countries that would no longer have access to the GSP would be Botswana, Gabon, Mauritius, Namibia, Seychelles, and South Africa.
24. As of yet, the list of countries is indicative and the final list of countries will be established a year before the new EU GSP becomes effective. In this Note, we assume that the current list of African beneficiaries remains stable.
25. **EU GSP duties by country.** On average, African non-LDCs would experience an average tariff of 2.2% on their exports. The table below provides this information by country. In total, Africa's exports without an EPA would be confronted with tariffs amounting to EUR 562.4 million, if exports stay at similar levels as those in 2008-2010.
26. Annex III provides country-by-country overviews of their respective Top 30 exports and applicable MFN and GSP rates in the EU.

⁸ Regulation (EU) No 512/2011 of the European Parliament and of the Council of 11 May 2011.

⁹ European Commission document COM(2011)241 final, Proposal for a Regulation of the European Parliament and of the Council applying a scheme of generalised tariff preferences, 10 May 2011, http://trade.ec.europa.eu/doclib/docs/2011/may/tradoc_147893.pdf. For the Memo on the proposal see http://trade.ec.europa.eu/doclib/docs/2011/may/tradoc_147892.pdf.

Table 4: Average tariff on exports

Country	Top30 exports to EU (average 2008-2010) in EUR million	GSP tariffs on Top 30 exports (average 2008-2010) in EUR million	Average tariff on exports/ «Duty burden»
Congo	964.5	-	0.0%
Nigeria	13,472.8	6.0	0.0%
Gabon	992.1	2.2	0.2%
Cameroon	2,028.0	40.5	2.0%
Cote d'Ivoire	3,017.0	88.9	2.9%
Ghana	1,174.3	37.1	3.2%
Botswana	542.4	26.9	5.0%
Namibia	716.3	43.3	6.0%
Kenya	1,015.1	62.2	6.1%
Zimbabwe	303.0	28.0	9.2%
Cape Verde	32.2	3.7	11.5%
Mauritius	778.3	138.0	17.7%
Seychelles	180.0	33.0	18.3%
Swaziland	143.7	52.6	36.6%
Total	25.359.7	562.4	2.2%

Note 1: We consider an EU import from an African country equal to an export of an African country to the EU. Generally, import data has a higher data quality since most tariffs are levied on imports. Also, EU's statistical office Eurostat has more recent trade data available.

Note 2: We take a three year average of EU imports from African non-LDCs, over the last three years for which data is available (2008, 2009 and 2010). This has been done to correct for one-off exports appearing in the Top30 and to smooth-out price fluctuations.

27. EU GSP duties by product. In total, 127 products would not be duty free under EU GSP, on an eight-digit level. Some product would fetch a disproportionate amount of tariffs. Raw cane sugar, bananas, preserved tunas and fresh bovine meat would make up 50% (EUR 280.46 million) of total duties. Annex 1 lists all products that would have duties under the EU's GSP.

Table 5: Products that would have duties under EU GSP (Top 10)

Nr	CN8 code	Description	Total exports by non-LDCs, EUR mln	Total duties under EU GSP, EUR mln
1	17011110	Raw Cane Sugar	223.31	109.20
2	08030019	Bananas	348.98	74.82
3	16041418	Prepared Or Preserved Tunas And Skipjack	299.91	61.48
4	02013000	Fresh Or Chilled Bovine Meat	54.43	34.96
5	17019910	White Sugar	54.53	32.95
6	16041411	Prepared Or Preserved Tunas And Skipjack	150.11	30.77
7	06031100	Fresh Cut Roses And Buds	282.92	24.05
8	18031000	Cocoa Paste (Excl. Defatted)	331.68	20.23
9	16041416	Fillets Known As "Loins" Of Tunas Or Skipjack	77.55	15.90
10	18040000	Cocoa Butter	356.78	14.98

Costs of EPA

28. It should be emphasized that this analysis only examines tariff revenue losses as a result of the EPA. In the case of the TDCA, not only South Africa was hit by declines in revenue but also the four other members of the Southern African Customs Union (SACU). (Once a good enters South-Africa and then circulates within SACU, no import duties can be levied again at the other SACU border posts.) This means that tariff revenue losses for Botswana, Namibia and Swaziland as a result of an EPA will be lower than for other African non-LDCs.
29. Tariff revenue losses are derived from UNECA's 2005 study (par 13). In this study, 1997 was the base year. Obviously, imports from the EU have grown since 1997. Tariff revenue losses based on current imports in current dollars is much larger than tariff revenue losses based on imports in 1997.
30. We have corrected the tariff revenue losses by calculated the increase in imports between 2003 and the average imports in 2008-2010. During this period, imports have grown with 70% in nominal terms.

Table 6: Tariff Revenue Losses for Africa based on imports 2008-2010 (by region)

Region	Tariff revenue loss (UNECA 2005)	Import from EU, 2003	Import from EU, 2008-2010	Correction factor (D / C)	Revenue loss, based on imports 2008-2010 (B x E)
A	B	C	D	E	F
West Africa	980.2	12,317	21,483	1.7	1,804.4
Central Africa	389.8	3,479	4,925	1.4	570.5
EAC	162.6	1,543	2,905	1.9	301.1
SADC EPA	121.0	2,488	6,010	2.4	302.7
ESA EPA	318.2	3,356	3,993	1.2	406.5
Sub Saharan Africa	1,971.8	23,183	39,316	1.7	3,385.2

See Annex II for a break-down of tariff revenue losses by country.

31. For each of the countries in Africa, the table below sums up the cost-benefit of implementing the EPA. These figures underestimate the costs, since it only draws on the immediate tariff revenue losses. Even so, it is clear that most countries in Africa stand to lose by signing the EPA.

Table 7: Benefit and Cost of Signing an EPA

Country	Duties under GSP (EUR mln)	Gains of Signing EPA	Costs of Signing EPA	Cost of EPA higher than benefit of EPA
		Duties under GSP (USD mln)	Tariff revenue loss (USD mln)	
Non LDCs	558.7	782.2	2,110.0	Yes
Botswana	26.9	37.7	5.4	No
Congo	-	-	173.5	Yes
Cote d'Ivoire	88.9	124.5	159.2	Yes
Cameroon	40.5	56.7	154.0	Yes
Gabon	2.2	3.1	88.1	Yes
Ghana	37.1	51.9	374.4	Yes
Kenya	62.2	87.1	193.8	Yes
Mauritius	138.0	193.2	50.3	No

Zimbabwe	28.0	39.2	15.4	No

LDCs	0	0	1,275.2	Yes
All Sub Saharan Africa	558.7	782.2	3,385.2	Yes

Note 1: the daily average EUR/USD rate during 2008-2010 was 1.4. Source: European Central Bank (ECB), <http://www.ecb.int/stats/exchange/eurofxref/html/index.en.html>

V. CONCLUSION

32. The paper shows that even with this simple cost-benefit analysis (looking only at one dimension of the costs), for most African countries, the tariff revenue losses with an EPA are higher than the duties at the EU border if there is no EPA. **The costs of an EPA are therefore greater than the gains!** These countries include all African LDCs, and non-LDCs: Congo, Cote d'Ivoire, Cameroon, Gabon, Ghana, Kenya and Nigeria.
33. Besides tariff revenue loss, there are other major risks to Africa's economic development from the EPAs. They have been highlighted in a common position paper on the Economic Partnership Agreements (EPAs) prepared by the African Union Commission and 5 regional economic communities (RECs) of Africa (ECOWAS, COMESA, EAC, SADC and ECCAS). The AU's Conference of African Trade Ministers in Kigali on 1-2 November 2010 welcomed the position paper and agreed to take into account the paper's options for Africa on the EPAs as a basis for political engagement with the EU Party at the highest political level.
34. The paper represents a remarkable expression of common concerns about the EPAs from the African region's most important political and economic regional agencies. The following major risks of the EPA to Africa's economic development, besides tariff revenue loss were highlighted:
35. **EPA's effect on Industrial Development:** The EU's position on the elimination of tariffs for 80% of trade; restrictions on the use of export taxes and quantitative restrictions and the standstill clause; will undermine Africa's efforts to industrialize and its ability to move up the industrial value chain. As a result, Africa will remain a perpetual supplier of raw materials.
36. **EPA's effect on Food Security and Rural Livelihoods:** The EU has not indicated a willingness to abolish its agricultural subsidies. This poses major unfair competition against African producers of milk, poultry, pork, beef, cereals, etc. At present, these subsidies and domestic supports are not being removed at the WTO, or in the EPA negotiations.

37. **EPA's effect on Regional Trade and Integration:** Regional markets provide the best opportunity for Africa to diversify and develop. If African countries in EPAs have to liberalize 80% of trade as proposed by the EU, Africa's regional markets risk being taken over by EU products. The opportunity to increase intra-African trade, diversify and industrialize will be significantly reduced.
38. **EPA's effect on Governments' Support of Local Enterprises and Industries:** If EPAs include services, investment, competition and government procurement, as the EU is demanding, they are likely to reduce African countries' policy space to regulate flows of capital, make difficult the ability of African countries to maximize the benefits of foreign investment and make it hard for governments to support or give preferences to local enterprises.
39. **EPA's effect on Development Due to Tighter Intellectual Property Disciplines:** The EU would like EPAs to include intellectual property rules. Such tighter WTO plus rules will make it more difficult for African countries to access the knowledge and technology needed to industrialize and increase agricultural production.
40. The position paper says that despite the progressive opening of African markets, high and sustainable economic growth has not been achieved and industrialization has not occurred. The key constraint has remained the inadequacy of productive capacities. There is great concern within Africa about the way the EPA negotiations have been conducted and about the outcome so far, adds the paper. Despite the resources and efforts devoted to these negotiations by African countries, the critical issues have still not yet been addressed. Nevertheless, Africa continues to seek an improved relationship with Europe to address the impediments to development and to strengthen its productive capacities.

ANNEX I – PRODUCTS THAT WILL HAVE DUTIES UNDER EXISTING EU GSP FOR NON-LDC AFRICAN COUNTRIES

Notes

^a Ad valorem equivalent (AVE) based on ITC Market Access Map.

^b The duty is not less than EUR 22 / 100 kg or more than EUR 24 / 100 kg (for Virginia type tobacco) or EUR 56 / 100 kg (for other types). According to ITC Market Access Map, the ad valorem equivalent duties range between 8.45% (for Virginia type) and 11.2% (other types). Most of Zimbabwe's exports are of the Virginia type. Under EU GSP, specific duties on sensitive products are reduced by 30 %.

^c The duty of 12% applies between 1 June and 31 October. A lower duty of 8.5% applies between 1 November and 31 May.

^d Specific duty of EUR 19.2 per 100 liter applies. Ad valorem equivalent (AVE) from ITC market access map.

^e Ad valorem equivalent (AVE) from ITC Market Access Map.
