CENTRE**

## **ReAct Africa and South Centre Conference 2019**

**Achieving Universal Health Coverage While  
Addressing Antimicrobial Resistance**

Four Points by Sheraton Nairobi Airport Hotel, Kenya  
23<sup>RD</sup> - 25<sup>TH</sup> JULY 2019

## MESSAGE FROM THE HEAD OF ReAct AFRICA

On behalf of ReAct Africa, South Centre and our support partners, I would like to officially welcome you to the 2019 Conference. The theme for this year's conference is 'Achieving Universal Health Coverage while addressing Antimicrobial Resistance'.

We are looking forward to hosting you for a three days discussion as we continue to support your efforts, the World Health Organization's and African Union's agenda on Universal Health Coverage and the AMR Global Action Plan.

It is my hope that the expectations you have, and the conference outcomes will be met by the end of the conference.

My heartfelt thanks to all of you.

Dr. Mirfin M. Mpundu  
EPN Executive Director & Head of ReAct Africa

# ReAct

---

Created in 2005, ReAct (Action on Antibiotic Resistance) is one of the first international independent networks to articulate the complex nature of antibiotic resistance and its drivers. ReAct was initiated with the goal to be a global catalyst, advocating and stimulating for global engagement on antibiotic resistance by collaborating with a broad range of organizations, individuals and stakeholders.

Over the years ReAct established nodes across the continents, currently having ReAct Europe, ReAct North America, ReAct Latin America, ReAct Asia Pacific and since 2014: ReAct Africa.

ReAct Africa brings together experts and key stakeholders.

We provide technical assistance in the development and implementation of the National Action Plans. ReAct Africa takes on a holistic perspective and raises awareness by informing the general public and different sectors including but not limited to the health veterinarian and agricultural sectors about antibiotic resistance. ReAct Africa increases collaboration with other relevant networks and organizations and advocates for concerted action on antimicrobial resistance.

## South Centre

---

The South Centre is the inter-governmental policy research institution of developing countries, with currently 54 developing country member States from Africa, Asia and the Pacific, and Latin America and the Caribbean. The South Centre promotes more effective South-South cooperation and coordination, supports developing countries in participating in and voicing their development interests and priorities more effectively in various multilateral and regional development policy-related issues and fora, and provides policy advice and technical assistance to governments on their national development-related policies. The main activities of the Centre are policy research and analysis, convening of meetings and conferences for developing countries to share views and experiences, and technical assistance and capacity building activities.

The issues taken up by the Centre include international and regional trade policy, global macroeconomic and finance issues, global public health, innovation and intellectual property policy, climate change, environment and sustainable development, international economic issues including tax policy, external debt and international investment policy; human rights policy; global governance for and North-South relations, South-South cooperation, and global governance for development.

The South Centre has three major institutional pillars: The Council of Representatives in which the Member States are represented; the Board comprising a Chairperson and members who act in their individual capacities and provide guidance to the Secretariat; and the Secretariat headed by the Executive Director which implements the activities of the South Centre. The Secretariat is accountable to and works under the guidance of the Board and the Council.

## EXPECTED CONFERENCE OUTCOMES ARE:

1

Raised awareness on the urgency of addressing antimicrobial resistance as a path towards achieving Universal Health Coverage.

2

That all participants have built understanding on the interconnected links between Antimicrobial Resistance and Universal Health Coverage.

3

That participants exchange experiences of Antimicrobial Resistance, Sustainable Development Goals Universal Health Coverage and identify synergies and entry points for work on Antimicrobial Resistance in current efforts for Universal Health Coverage.

4

Learning from exchange of experiences on the antimicrobial resistance situation and policy responses at the country level, including on national action plans, and including needs, successes and challenges faced in implementation.

5

Cross learning and fertilization from current country vertical programs.

6

Develop inputs for global antimicrobial resistance governance; how to keep the political momentum on AMR high up on the global agenda, improve intergovernmental agency coordination, ensure accountability and sustained financial resources to support regional AMR efforts.

## PARTICIPANTS BIOS

### Abubakar Aliyu Jafiya

Dr. Abubakar Aliyu Jafiya is an Assistant Director Surveillance and Epidemiology, Nigeria Centre for Disease Control (NCDC) and member of the Antimicrobial Resistance National Technical working group. Before joining NCDC he worked with Borno State Government for more than twenty years where he rose to the rank of Chief Veterinary Officer and was seconded to the African Field Epidemiology Network (AFENET) to support the polio eradication efforts of the Nigerian Government in 2013. He was a Health Systems Strengthening Consultant for Mcking Consulting USA for three years. Born 52 years ago, Dr Jafiya graduated from University of Maiduguri in 1990 as a Doctor of Veterinary Medicine and holds a Master's degree in Public Health from ABU Zaria, Nigeria. He has three publications and several local and international conference papers. He is married and blessed with four children.

### Abdhahah Ziraba

Dr. Ziraba is an epidemiologist and medical doctor with over 15 years' research experience. He is the head, Health and Systems for Health research unit, at the African population and Health Research Center overseeing the unit's scientific productivity. He has published over 30 peer-reviewed articles, book chapters, and over 15 major reports. Ziraba has a PhD in Epidemiology and Population Health from the London School of Hygiene and Tropical Medicine, a Masters (Epidemiology and Biostatistics) and a Bachelors in Medicine and Surgery from Makerere University. Research interests include, health services research, infectious diseases, health and demographic surveillance, and impact evaluations.

### Adeyinka John Odebode

Adeyinka John Odebode, PhD is a Researcher and Lecturer in the Department of Environment and Natural Science, Kabale University, Uganda. His Research emphasis are on public health burden of human fungal diseases because fungal infections are understudied and under-diagnosed compared with other infectious diseases, despite their contribution to so many deaths every year. He also has research interest in Antifungal resistance, just as antibiotics have become less effective as bacteria have become more resistant to them, the same is happening with anti-fungal drugs albeit to a lesser extent. The greatest challenge is that there is much less awareness of Antifungal resistance problem which drives his passion for research in this area because We're beginning to see more cases of drug-resistant strains of Aspergillus. Thus, it is necessary to gain a better insight into the antifungal resistance mechanisms and their clinical impact.

### Aissi K. Alain

From Benin Health Ministry. 40 years old, married and father of 4 children. PhD in Environmental Health and a Diploma in Hygiene, Prevention and Control of Infections. Active participant as AMR Focal Point in the process of implementing a National AMR Plan following the One Health approach. Member of the Mobile Response Team to Epidemics and Health Emergencies currently recruited as a specialist in the REDISSE III Project Management Unit.

## Andreas Sandgren

Dr. Andreas Sandgren, Deputy Head of ReAct Europe, Policy Advisor.

As a Policy Advisor at ReAct, Andreas Sandgren follows the international policy debate on antibiotic resistance and provides support to the development of policy analysis and advocacy activities. Before joining ReAct he has worked as a freelance consultant in public health, a tuberculosis expert at the European Centre for Disease Prevention and Control (ECDC), and was a postdoctoral research fellow at Harvard School of Public Health. Andreas holds a PhD in infection biology from Karolinska Institute and a MSc in medical sciences from Uppsala University.

## Andrea Vogt

Andrea works as a communications professional advising global foundations, not-for-profits and institutions. She oversees GHS's support to the Medicines We Can Trust campaign, a global movement to raise awareness of and inspire collective action for quality medicines. Since joining GHS, Andrea has worked on advocacy campaigns for family planning, vaccines, nutrition, global health innovation and access to medicines. Prior to joining GHS, she worked on the United Nations' Ebola Team, where she established protocols, training and evaluation methods to ensure the safety of UN staff during the wake of the 2014 Ebola crisis. Andrea has a Bachelor's of Science in Biology of Global Health from Georgetown University.

## Audu Rauf

Currently the Registrar of Pharmacy Council, Ghana. A pharmacist by training, with specialization in Clinical Pharmacy, PhD, MSc, BPharm. A Fellow of Ghana College of Pharmacists, Member of WAPCP, Member of American College of Clinical Pharmacists, ACCP, Member of International Pharmaceutical Federation, FIP. Has served as temporal consultant to World Health Organization.

A member of the Governing Board of Food and Drug Authority, FDA, Ghana.

## Badreldin Saeed Hagnour

Background: Pharmacist Bsc Msc MD pharmacy Work: Ministry of Health Sudan

Position: National Focal Point for AMR Human

Achievements: Coordinated the development of Sudan National Action Plan On AMR with various stakeholders-Animal and agriculture Environment etc. in coordination with Animal Focal Point And

WHO Khartoum Office.

AMR Activities in collaboration with WHO and EMRO. eg Global surveillance of AMR System ,TRCYCLIC and behavior change program( TAP) In addition to World Antibiotic Awareness week (WAAW)

## Borna Nyaoke-Anoke

Dr. Borna Nyaoke-Anoke is a clinical researcher and public health specialist. She is a medical doctor by profession having graduated with a Bachelor of Medicine and Bachelor of Surgery (MBChB) degree from The University of Nairobi. She has completed the Global Clinical Scholars Research Training (GCSRT) Program with the Harvard Medical School and has a Master of Public Health degree with a concentration in Health Systems Management from the University of Liverpool.

Dr. Borna currently works as the Clinical Trials Manager at Drugs for Neglected Diseases initiative (DNDi), a collaborative, patients' needs-driven, non-profit drug research and development (R&D) organization that is developing new treatments for neglected diseases. At DNDi, Dr. Borna manages the Phase-II Mycetoma clinical trial in Khartoum, Sudan. She is also the Clinical Trials Manager for the Global Antibiotic Research & Development Partnership (GARDP), a joint initiative by the World Health Organization (WHO) and DNDi for the Pharmacokinetic and Observational studies in neonatal sepsis in Kenya and Uganda.

## Bashiru Boi Kikimoto

My name is Dr. Bashiru Boi Kikimoto, I hold a DVM MSc. Vet. Med, MSc. Molecular Biology and Biotechnology and a PhD in veterinary Public Health. Currently I am the head of the Public Health & Food Safety Unit and the head of the National AMR Ref Laboratory for Animal Health which is also the national food Safety Laboratory for Animal Health. I started as a veterinary officer and rose through the ranks till deputy Director of veterinary services until 2012 when I was recognized by Veterinary Council of Ghana as Veterinary Medical Specialist. I have been part of AMR platform of Ghana since 2012 and participated in the drafting and adoption of Ghana's AMR Policy and NAP documents. I am the OIE AMR Focal point for Animal health and also the contact person for FAO and WHO on AMR for veterinary services. Have participated in many international AMR conferences in India, Rome, Morocco, Kenya and had cycle trainings by OIE on AMU data collection mechanisms. Have served as member of Board of Directors for FDA from 2010-2017. Have served as Chairman of National Codex Committee of Ghana from 2014-2016. Currently involved with Fleming fund AMR programmes and am the Animal Health technical lead for MottMacDonalds project for Ghana. Currently carrying out AST for certain isolates from poultry samples in the National AMR reference laboratory as a preparation for standardization of protocols and equipment.

## Catherine Theuri

Catherine Wangui Theuri (Kenya) is a development professional with over 10 years experience in health systems strengthening and policy formulation. She has been involved in capacity assessments and capacity development initiatives with National and County Government Health Sectors, Civil Society Organizations and the Faith Sector in Kenya, Tanzania, Uganda, Botswana and South Sudan. She holds a Master of Science (Education for Sustainability) from the London South Bank University, a Master of Arts (Biblical Counseling) from The Nairobi International School of Theology and a Bachelor of Education from The Kenyatta University.

## Chipupu Kandeke

Chipupu Kandeke is a Health Systems Pharmacist with more than 25 years of experience in the public (Ministry of Health), NGO (Churches Health Association Zambia) and private (retail and wholesale) pharmaceutical sectors in Zambia. He holds a BSc Pharmacy from University of Dar Es Salam, a Master of Science in Health Systems Management from University of London and is pursuing a PhD in Management (Strategic). He is currently Health Systems Pharmacist/Managing Consultant at Elevate Pharmacy Consulting. Elevate consults with public, private national and international NGOs in health and pharmaceutical management issues. His interest in attending the meeting is to advocate for the development of antimicrobial stewardship initiatives in community/retail pharmacies in Zambia.

## Christian Mugabo

Christian MUGABO graduated from university of Rwanda, School of Medicine and Pharmacy with Bachelor of Science with Honors in Pharmacy, He is a registered Pharmacist, He is a member of National Pharmacy Council, He is the Deputy Chairperson of the 65th International Pharmaceutical Students' Federation (IPSF) World Congress, He is the Founder, Co-chair and country director of the International Students' Partnership for Antibiotic Resistance Education (ISPARE) that mirrors Objective One of the World Health Organizations Global Action Plan on Antimicrobial Drug Resistance (2015), He initiated Antibiotic Surveillance among University Students of Rwanda. He was the former Speaker, information and Publication officer of Rwanda Pharmaceutical Students' Association (RPSA), Monitoring and evaluation of Rwanda community Promoters (RVCP) just to mention few, He was taking part in organization of conferences including this coming IPSF World Congress, Vice- Chairperson of 7th World Healthcare Students' Symposium, RPSA international Annual Symposia and Global Health Courses in Africa among others, He was taking part in health campaigns including awareness on Antimicrobial resistance, rational medicine use, just to mention few.

### **Chrissy M.W Chulu**

Chrissy M.W Chulu is a pharmacist and serves as a Medicines Inspections Officer (MIO) for Pharmacy Medicines and Poisons Board. She earned a MSc. in Pharmacy Administration from University of the Western Cape and a BSc in Pharmacy (Hons) from the College of Medicine of the University of Malawi. In addition to working as a MIO, she has engaged in various managerial roles and responsibilities such as deputising head of inspectorate section, coordinating regulatory programmes (Post Marketing Surveillance, Pharmacovigilance and Internship) which she has effectively delivered and is WHO focal person on Substandard and Falsified Medical products (SFM) in Malawi.

### **Cohen Andove**

Cohen Andove is the current President of the Pharmacy Student's Association of Kenya (KEPhSA). He served as the chair of the USIU-Africa Pharmacy Association where he carried out several initiatives that culminated in him being voted as the best club leader for the year 2018 at his university. Andove aspires to play a role in formulating health policy that will help make health affordable and accessible. He will run a football tournament in December this year in his native Western, Kenya that aims to promote awareness on aspects such as drug abuse, teenage pregnancies and AMR.

### **Collins Mitambo**

Dr. Collins Mitambo is the Acting Director of Research in the Ministry of Health and Population. He also serves as the Head of Secretariat for the National Health Sciences Research Committee. He is a member of the Senior Management Team (SMT) a decision making body of the Ministry of Health. Dr Mitambo is one of the members of the Taskforce which drafted the National Action Plan for Antimicrobial Resistance. Dr Mitambo has disseminated papers on antimicrobial resistance on several scientific forums.

### **Cyprien Baribwira**

Center for International Health, Education, and Biosecurity CIHEB) of University of Maryland School of Medicine – Rwanda: Country Director

I have spent the last 30 years working in sub-Sahara Africa (mainly in Burundi, DRC, Rwanda) as lecturer, clinician, oversight of public health programming and researcher.

My focus is about ID and malnutrition in children.

Since 2009 I joined University of Maryland (Baltimore) HIV programs in supporting Rwanda HIV programming and where currently I am Principal Investigator/Project director of a 5 years grant for health system strengthening.

I am AMR pioneer in Rwanda and member of React - Africa node.

### **Daniel Ndambasia**

Dr. Ndambasia was born in Chililabombwe and did his GCE education at Mpelembe Secondary School. He went on to study for his Bachelor in Veterinary Medicine at the University of Zambia. He has worked for the University of Zambia as House Surgeon, the Lusaka Apex University and is currently employed by the Zambia Medicines Regulatory Authority as a Registration Officer. He is also the ZAMRA focal point person on Antimicrobial Resistance.

## Dennis Amonde

Dennis Amonde is a Head of Programs and M&E with Ace Africa Kenya. He has first degree in Environmental Science from Egerton University. A post graduate degree in Community health and development is on course at Great Lakes University. Other academic qualifications are in; M&E, participatory assessment, grant writing, financial management, board governance, children and HIV/AIDS program management from University of Nairobi, Egerton University, Aga Khan health services and Mango UK. He has over 14 years of experience in Community health work in Kenya, Tanzania, DR Congo, Somalia, and Ethiopia. Experience includes work in project management, project baselines, evaluation and research, grant writing, report writing, environmental impact assessment, volunteer management, capacity building, strategic planning and M&E. Prior to his current role, he was the deputy country director of Ace Africa Kenya. He is currently supporting pilot project on promoting the proper use of antibiotics and appreciation of the microbial World through Child to Child schools in Kenya. He is also heading other Ace Africa programs on livelihoods, child protection, governance and maternal health in 9 counties in Kenya.

## Diana Koh Gahn-Smith

My name is Diana Koh Gahn-Smith and I am from Liberia. I am a Pharmacist who works with the Ministry of Health as the National Antimicrobial Resistance Focal Point in my country. The Ministry of Health is situated within Monrovia, the capital city of Liberia. I worked as a Hospital Pharmacist at one of the major referral hospitals for seven years. I am presently doing a post graduate program in the West African Post Graduate College of Pharmacy with emphasis in clinical pharmacy. Liberia is located on the West Coast of Africa with a population of approximately 5 million. The country has approximately thirty eight (38) hospitals, seventy (70) health centers and seven hundred and thirty four (734) clinics. These numbers include both public and private health facilities. There are also approximately one hundred and fifty three (153) whole sale and retail pharmacies and seven hundred and twenty (720) medicines stores.

## Egide Muziganyi

Senior Pharmacist, responsible for production and distribution at BUFMAR one of national Supply Chain Organization. Prior to BUFMAR, I served for the period of 6 years with role of Director of District Pharmacy, a decentralized government supply chain organization responsible for procuring, storage and distribution of medicines and medical consumable to all Health facilities within the district based catchment area. My carrier began as District hospital pharmacist for 2 years (2010-2011) where my responsibilities were especially related to ensure constant availability, ensure rational use of medicines. To this also there was the responsibility of being drug and therapeutic committee secretary.

## Emmanuel Kabali

Emmanuel is Coordinating the FAO Southern Africa component of the AMR project, with support from the Fleming Fund covering activities in SADC member states with Tanzania, Zambia and Zimbabwe as project focus countries. The project focus areas include implementation of the GAP in Food and Agriculture sectors, guided by the FAO Action Plan on AMR 2016 – 2020, and applying the One Health approach. Key activities undertaken include supporting countries finalize and cost the NAPs on AMR, develop national AMR surveillance plans, and support the coordination and mobilization of consensus around SADC AMR regional strategies and actions on AMR. He holds Bachelor of Veterinary Medicine (UNZA) and MSc in Veterinary Medicine (UNZA), specialization in Veterinary Pathology (Japan), and MSc in Pharmacy Administration and Policy Regulation (UWC). He has worked as Veterinary Surgeon for Large Animal and Wildlife Medicine, and as Pharmaceutical Inspector and Quality Assurance Manager at the Zambia Medicines Regulatory Authority. He is currently pursuing a PhD in Veterinary Science (University of Miyazaki) with support from the Japanese Society for the Promotion of Science (JSPS). His area of research is "Risk Analysis of AMR Transmission at the Wildlife-Livestock-Human Interface in Zambia".

## Elizabeth Shekalaghe

Elizabeth Shekalaghe is a Public Health Pharmacist working with the Pharmacy Council of Tanzania as the Registrar since April 2014. Prior to joining the Pharmacy Council, she worked with Tanzania Food & Drugs Authority (TFDA) for the past 13 years as a Senior Pharmacist and Drug Inspector. Since 2008, she was a lead to the Accredited Drug Dispensing Outlets Program (ADDO) as the Program Manager responsible for the National rollout coordination until when the program was handled over to the Pharmacy Council in August 2013. Elizabeth has also worked with TFDA as Drug Registration and Evaluation Officer. During establishment of the Pharmacy Council, She was seconded from TFDA to support the initial set up of the Council where she initiated the development of the Pharmacy Act, 2002 and other relevant documents needed to establish the Pharmacy Council. Elizabeth holds a MSc. in Leadership, Management and Change from Bradford University, UK (2009), A Master's Degree in Public Health from Muhimbili University of Health and Allied Sciences, Tanzania (2005). She is also a holder of Bachelor of Pharmacy Degree (1999). Elizabeth has a vast experience in working at Pharmaceutical regulatory environment, working with development partners in health during which was the top agenda during the time of ADDO implementation..

## Erick Venant

Erick Venant is a founder and CEO at Roll Back Antimicrobial Resistance Initiative (RBA Initiative) a NGO based and registered in Tanzania with special focus on AMR where he positively contribute to reinforce the organizational values. Erick has recently received the Diana Award, an International award given to outstanding young people in memory of Princess Diana. He believes combating AMR requires urgent and collective efforts. In 2017 he led a nationwide AMR awareness campaign which reached 23 regions in Tanzania. In June 2018, Erick received Pharmacy week award presented by deputy minister of health in Tanzania. He is also the Co-Founder-International Students Partnership Against Antibiotic resistance (ISPARE-GLOBAL). Erick is a recent graduate holds a bachelor of Pharmacy from St. John's University of Tanzania

## Ernest Rwagasana

Currently Director General of BUFMAR since 2006, NGO owned by Christian Churches (catholic and protestant) in charge of managing that NGO for better supply of essential medicines, medical consumables and medical equipments for Public and Private Sector countrywide.

Prior to current position, I was Director General of CAMERWA (named today MPPD) 8 years (1998-2006).

In my earlier career, I served as public servant 15 years in National Energy Company called ELECTROGAZ (named today REG) in charge of internal audit.

## Evelyn Wesangula

Evelyn Wesangula is the National Focal Point for antimicrobial resistance in Kenya with over ten years working with the Ministry of Health. Evelyn coordinated antibiotic awareness weeks for five consecutive years in Kenya under the Global Antibiotic Resistance Partnership multi-sectoral working group leading to the establishment of the AMR program in Kenya. She has championed the development of the National Policy and Action Plan for AMR in Kenya and now leads the implementation process. She has been key in the implementation of infection prevention and control (IPC) interventions at the country level. She has worked as a consultant with the WHO on developing guidance on establishing and sustaining multi-sectoral collaboration to support implementation of National Action Plans. She is a member of the Fleming Fund Technical Advisory Group and an African Public Health Leaders fellow at the Chatham House Institute and is pursuing her PHD on antimicrobial stewardship at the University of Nairobi. Evelyn is committed to overcoming barriers and building partnerships to sustain changes that will reduce the global burden of AMR.

## Francis Kofi Nyame

Francis (Kofi) Aboagye-Nyame, B.Pharm(Hons) MSc MBAMPS Gh FGCP Pharm FPC Pharm is the Program Director of the Medicines, Technologies and Pharmaceutical Services Program (MTaPS), a USAID funded contract for strengthening pharmaceutical systems. Previously, he was the Program Director of the SIAPS program and guided efforts to strengthen pharmaceutical systems in LMICs. He has held senior positions on the SPS, SCMS and RPM Plus projects, including Technical Deputy Director and then Program Director of the SPS program. Before joining MSH, he worked as Deputy Program Manager of the Ghana National Drugs Program and Head of Ghana Ministry of Health's Procurement Unit.

## Freddy Kitutu

Freddy Eric Kitutu is a Lecturer, Health Systems Pharmacist and Researcher at Makerere University in Uganda. He has a doctoral degree in Medical Science from Uppsala University of Sweden. He teaches on courses for undergraduate pharmacy students and postgraduate pharmacy, medical and public health students. He is involved in pharmaceutical and health systems interventions to improve adequate access to life-saving medicines and health technologies, with particular bias to under-five children in rural areas. He has provided technical advice to the WHO, the Uganda Ministry of Health, Ministry of Agriculture, Animal Industries and Fisheries, the Uganda National Drug Authority and other Universities on topics including essential medicines lists, standard treatment guidelines and antimicrobial consumption and stewardship. He has done work in Uganda, South Sudan and Rwanda and visited multiple other countries. His research and work have produced five first author scientific articles and over fifteen co-author articles in peer-reviewed journals on various topics related to pharmaceutical systems strengthening. He also currently serves as the antimicrobial consumption and use program lead at Makerere University Pharmacy Department, working closely with government to implement relevant activities prioritized in the AMR National Action Plan 2018 to 2023.

## Greville Saruti

I am a medical Doctor, originally from Congo. I am currently doing my Masters in Family Medicine at Kabarak University, Nakuru. I did my undergraduate in DR Congo, where I graduated and finished my internship in 2015. I am based in PCEA Chogoria Mission Hospital for some clinical rotations as part of my masters.

I am doing my thesis project in the line of inappropriate antibiotic prescriptions and the title is: Prevalence and Determinants of antibiotic prescriptions for Upper Respiratory Tract Infection among under-fives in outpatient clinics in Tharaka Nithi County. I am fluent in French, English, Swahili and Lingala.

## Gunturu Revathi

Prof Gunturu Revathi is Associate Professor of Clinical Microbiology at the Aga Khan University, Nairobi, visiting faculty at the University of Nairobi and the Jomo Kenyatta University of Science and Technology. She has 25 years of professional experience having worked in the Cytology Research Center at the Maulana Azad Medical College, New Delhi, Dept. of Microbiology at University College of Medical Sciences

-New Delhi before moving to Kenya. She was head of the department of laboratory medicine at the Kenyatta National Hospital for 8 years while being a faculty member of the Department of Medical Microbiology at the College of Health Sciences, Nairobi. She is a visiting scientist at the Kenya Medical Research Institute where she is engaged in collaborative research projects. She is on various National advisory committees such as KAPTLD, Technical advisory committee for National Program for Tuberculosis and Leprosy, National committee on Infection prevention and control, Kenya National committee on Infectious and Parasitic Diseases Research (IPDRPC), National working group for Clinical Management and Referral guidelines and National Antimicrobial Stewardship committee and the National technical working group for AMR surveillance of the Ministry of Health, Republic of Kenya.

## Haoua Haroun Saker

My name Haoua Haroun Saker, I was born October 31, 1962 in N'Djamena, I completed my primary education at the girls' school, annex downtown school and high school at the Colegio Nacional Female N'Djamena. I studied in the Soviet Union where I got my PhD in Pharmacy and today I am a professional pharmacist.

I was Head of Pharmacy Department, Head of Supply to the CPA, currently Director of Pharmacy at the Ministry of Public Health.

Treasurer to ONPT. In my spare time I like to read, watch TV and visit family.

## Hayat Seid

I am Hayat Seid; I received my doctorate degree in Veterinary Medicine from Addis Ababa university college of Veterinary Medicine in 2008. I worked as a field veterinarian in one district for one year. In 2012, I joined Addis Ababa University to do my Master Degree on Veterinary public health and graduated in July 2013. I joined Veterinary Drug and Feed Administration and Control Authority. Currently I am working as Veterinary Drug registration and licensing expert as well as AMR focal person. As AMR focal person I am giving trainings for veterinary professionals, Journalist and general public on rational drug use and AMR.

## Hassan Abdelrahman Ataelseed Abdelrahman

Bachelor of Pharmacy (Honor), University of Khartoum, 1996

MSc. in Pharmacy Practices, Faculty of Pharmacy, University of Gezira, 2007.

Diploma in Research Methodology and Biostatistics, University of Medical Sciences and Technology, 2010

DG, Directorate General of Pharmacy, Federal Ministry of Health, Khartoum, Sudan  
Secretariat General, NMPB, Khartoum, Sudan (Acting)

Minister of Health and Population, River Nile State (RNS), Sudan (2015 – 2016) Minister of Health, Northern State (NS), Sudan (2010 – 2015)

General Manager of RDF, Central Medical Supplies (2008 – 2010)

State Manager of Revolving Drugs Fund (RDF), Northern State, Sudan (2002 – 2005)

## Hezron Kiptum

Hezron holds a Degree in Information and Communication Technology. He is the Communications and Information Technology (IT) Assistant at the EPN. He is responsible for planning and delivery of IT services, providing technical support and ensuring smoothing running of operations on the areas information technology. He also plays communications roles including website, social media management among others

## Inweregbu Ugochi Stellamaris

Inweregbu Ugochi Stellamaris is a Scientific Officer with the Nigeria Center for Disease Control (NCDC). She is a member of the AMR Secretariat team at NCDC and has supported AMR activities since 2017. She was actively involved in the development of AMR Surveillance guidelines and supports the annual commemoration of the National Antibiotics Awareness week in Nigeria. She also supports coordination of AMR activities in the country which include workshops, meetings, conferences, symposium and trainings. Inweregbu Ugochi Stellamaris also assists the Director, Department of Prevention and Program Coordination in NCDC in coordinating activities of the department.

## Jane Lwoyero

Dr. Jane Lwoyero is a Veterinarian working for the OIE Sub-Regional Représentation for Eastern Africa as a Program Officer on Antimicrobial Resistance. She is the technical officer supporting the implementation of the OIE Strategy on AMR and the prudent use of Antimicrobials. She also specializes in One Health and Food Safety. Jane holds a master of science in Veterinary Public Health (University of Nairobi), diploma in One Health (Copenhagen University, Denmark) Governance and Food Safety in International Food Chains (Wageningen UR, Netherlands) and research on antibiotic residues and AMR (Borlaug Fellowship, Washington State University, USA).

## James Mireri

James is a Certified Public Accountant, CPA (K) and holds an MBA (Finance) from Kenyatta University and has worked with Ecumenical Pharmaceutical Network since 2008. He provides financial support, in requesting and accounting for all funds received into the organisation. He does monitoring and review of expenditure and provide regular reports as and when required. He also coordinates all the audits done in the organization. He also works closely with implementing partners and ensures there is completeness, accuracy and proper accountability, as well as compliance to laid down policies and procedures. He is married with 2 children and likes football.

## Janet Midega

Janet Midega is a Science program officer in Wellcome's Drug Resistant Infections (DRI) team where she is leading research activities within Wellcome's priority program on DRI. She provides scientific leadership, program development and management support to the AMR surveillance and epidemiology program with a focus on determining the global burden of AMR. She also leads science and policy research which aims at evaluating how legislative changes banning antibiotic use in animal meat production can reduce the potential transfer of resistant pathogens between animals and humans; and a surveillance program on the development of a comprehensive data capture system for patient-focussed AMR surveillance in LMIC settings. In line with the DRI programmes interest in accelerating the development of new antibiotics, Janet works closely with CARB-x based at Boston University, USA to support the discovery and development of novel antibiotics, as part of Wellcome's role as an accelerator and support for companies joining CARBx. Janet has over ten years' experience in the biology of disease vectors and genetic epidemiology of malaria, having conducted academic research at Imperial College, London and University of Oxford, Big Data Institute; in collaboration with the KEMRI- Wellcome Trust Research Programme, Kenya.

## Japheth A. Opintan

Dr. Japheth A. Opintan is a clinical microbiologist and a Senior lecturer at the University of Ghana, and coordinates the Healthcare Associated Infections Project in Ghana (<https://haiproject.org/>). Dr. Opintan served as visiting Research Fellow at several institutions including the Division of Infectious Diseases and International Health, University of Virginia (USA), the Global Health Initiative, Division of BioMed, Brown University (USA), the Department of Medicine/ Wellcome Trust Sanger Institute, Cambridge (UK). Dr. Opintan is currently the technical lead for the Fleming Country Grant in Ghana and also a member of the Surveillance and Epidemiology of Drug Resistant Infections Consortium (SEDRIIC).

## Jeremy Knox

Jeremy Knox leads the Wellcome Trust's expanding policy and advocacy programme on antimicrobial resistance, as a key part of the organisation's five- year, £175m commitment to support the global response to drug-resistant infections through integrated research and policy activities. He joined Wellcome in July 2017 after eight years working in government at the UK Department for Health. During this time, Jeremy worked in public and global health roles, including a two year secondment from 2014 to 2016 to be deputy head of the small team working on Lord Jim O'Neill's Review on Antimicrobial Resistance. Having originally studied economics at the University of Nottingham, Jeremy also holds a master's degree in Health Policy from Imperial College, London.

### John Edward Msafiri

John Edward Msafiri worked for a number of years as a Laboratory Manager at Nkinga Regional Referral Hospital in Tabora region, Tanzania. He has been working in Microbiology department at the same time involved in teaching students from Nkinga Institute of Health Sciences and junior staff. Currently he is working for quality management system within the laboratory for international accreditation.

### John Jao Majimbo

Chief Pharmacist, Kenya Ports Authority.

Graduated from the Kharkov State Pharmacy Institute, UKRAINE. Member; Pharmaceutical Society of Kenya and Hospital Pharmacists Association of Kenya Work Place: Kenya Ports Authority, Medical Department Current Position: Chief Pharmacist, Kenya Ports Authority Other positions held within the Authority: Chair, Employee Assistance Programme Vice Chair, Medicines and Therapeutics Committee Co-coordinator, Continuous Professional Development Programme Member, Board of Governors, Dr. Krapf Memorial Secondary School, Rabai.

### Julian Nyamupachitu

Julian is a Monitoring and Evaluation specialist currently responsible for project implementation and monitoring and evaluation for the Ecumenical Pharmaceutical Network. Julian is also the Communications coordinator for ReAct Africa where she is responsible for regular reporting of activities in the region in line with the Global Communication Plan. Julian also supports in project implementation and monitoring and evaluation for the various ReAct Africa projects. Before moving to EPN, she was a consultant with IMA World Health/ACHAP. Julian has vast experience in project planning and management in various organizations including Standard Chartered Bank and Jon Prins Foundation.

### John Ken Muma

Dr. John Ken Muma is currently serving as the Chief Executive Officer of AIC Kijabe Hospital (AICKH). He is a fellow of the college of surgeons of eastern, central and southern Africa FCS (ECSA) paediatric surgery. He has been a practicing physician for the last 15 years and a paediatric surgeon for the last 4 years. He drives health care through system changes. At a macro level his interests are in universal health care and management of bellwether surgical conditions in children. At a micro level, he is interested in driving healthcare through people and culture, and sustainable health care in mission hospitals.

### Kapona Otridah

Otridah is a Public Health Laboratory Scientist specialized in Communicable Diseases, with a background in Entomology, Parasitology and Molecular Biology. She spent the first 5 years of her career working on WHO and CDC funded TB/HIV AIDS Projects as a Laboratory/Research Scientist specializing in HIV/TB diagnosis and management before joining the Ministry of Health as Laboratory Scientist-Communicable Diseases in 2015. Since 2016, she has been working as a Public Health Laboratory Scientist at the Zambia National Public Health Institute (ZNPHI) focusing on Laboratory Systems development and implementation, and Anti-Microbial Resistance (AMR) Surveillance. Otridah has also been serving as the National Focal Person and Coordinator for AMR. She has overseen the successful formulation and completion of Zambia's first Multisectoral National Action Plan on AMR and is currently coordinating and spearheading its implementation.

### **Kennedy Kibukho**

Dr. Kennedy Kibukho is a project management, and monitoring and evaluation expert with over 15 years' practical experience. He holds a PhD in Project Planning and Management (Monitoring and Evaluation specialization), MA (Project Planning and Management) and Bachelors of Education. Kennedy has extensive experience across several disciplines including: health, education, water and sanitation, evaluation research, action-research, sustainable development, transparency and accountability cutting across different organizations, including World Vision International, RTI International, Norwegian Refugee Council, Transparency International, and VSO Jitolee. His passion is building program excellence and effectiveness in sustainable development programming through research, reflection, learning and documentation of best practices.

### **Laetitia Gahimbare**

Since February 2017, Dr. Laetitia Gahimbare is one the Technical Officers for AMR at WHO Regional Office for Africa, Brazzaville, Congo coordinating the development and implementation of AMR National action Plans in 47 countries. Prior to this assignment, she was a WHO Consultant in Liberia during the post-Ebola crisis helping to restore normal laboratory services, including Microbiology testing. Laetitia served 15 years in Rwanda with the Faculty of Medicine/National University of Rwanda, Referral Hospitals and USAID funded projects where she contributed to strengthen health systems through lectures, improved laboratory diagnostics and enhanced logistics system of HIV/AIDS medicines and Laboratory commodities.

### **Lineo Grace Nyenye**

Lineo Grace Nyenye is a trained pharmacist working at Maluti Adventist Hospital as a head of department. She started a pharmacovigilance program at the hospital where she is working. She was also part of steering committee member for establishing national pharmacovigilance program years later. She is currently the chairperson of Berea district pharmacy clinical team and secretary for district second line HIV/AIDS advisory committee for patients failing on first line HAART treatment. She also made a contribution in 2nd edition ministry of health standard treatment guidelines for Lesotho published 2017. She is part of hospital antibiotic review team.

### **Lucy Tirop**

Dr. Lucy Tirop is a registered pharmacist and a senior lecturer at the Department of Pharmaceutics and Pharmacy Practice, School of Pharmacy, University of Nairobi. She holds a PhD. in Pharmaceutical Sciences from Kings College, University of London.

Dr. Tirop offers consultancy services to local pharmaceutical industries, hospitals and the Pharmacy and Poisons Board. Her research interests include employing nanotechnology to address drug formulation challenges, pharmaceutical compounding and developing age-appropriate pediatric medicines.

Dr. Tirop serves as the university resource person for the "Antimicrobial stewardship student club - University of Nairobi" founded in collaboration with ReAct Africa.

### **Marlon Banda**

Marlon Banda is the current EPN Board Chairman and Director of Pharmaceutical Services at Christian Health Association of Zambia (CHAZ). Marlon has been Board Chair since May 2016. He has vast experience in the pharmaceutical field and has attained several qualifications and experience in the pharmaceutical sector having worked for UNICEF, Global Fund, John Snow among others. He has expertise in supply chain, sourcing commodities across programs such as ARVs, ACTs and related products, quality assurance management and technical assistance provision across the pharmaceutical sector disciplines.

### **MacDonald Chisale**

MacDonald Chisale is a holder of BSc degree in Animal Science obtained at Bunda College of Agriculture in Malawi in the year 2008 and Bachelor of Veterinary Medicine obtained at University of Zambia in 2016. He is currently working at Central Veterinary Laboratory in Malawi as Principal Disease Investigation Officer. His responsibilities include sample collection, postmortem of different species of animals, sample processing, laboratory result interpretation and client education on different disease conditions.

### **Marissa Malchione**

Ms. Malchione is a Fellow in Quality of Medical Products at Georgetown University sponsored by the USP Quality Institute, which aims to establish an evidence base for the value of quality medicines. Her work focuses on understanding the progress and process of planning and implementing National Action Plans on AMR in countries that have incorporated antimicrobial quality assurance into their AMR plans. Through highlighting successes and elucidating challenges, this work aims to support and inform other countries' quality-related NAP activities. She received her Master of Science in Public Health Microbiology and Emerging Infectious Diseases from The George Washington University.

### **Mercy Korir**

Dr. Mercy Korir is results driven, goal-orientated individual. She holds a Bachelor's degree in Medicine and Surgery (MBChB) and a Master of Arts degree in Communication Studies (Development Communication) both from the University of Nairobi. Her 4 year clinical practice has been intense and extensive in both public and private health sectors in the country, caring for patients from a range of backgrounds. For the last 3 years, Dr. Korir has been a medical journalist with KTN News based in Nairobi, uniquely blending in her medical background to report on health, highlighting health topics that are of interest to the public and society at large. She does both written and broadcast health stories in the various platforms by The Standard Group, one of the leading media houses in Kenya.

### **Medegan Mario Crios**

Dr Mario MEDEGAN is a Beninese medical doctor and public health professional passionate about serving vulnerable populations to address health inequities. He has a range of experience in humanitarian assistance and has worked in multicultural contexts across West-Africa. Since 2007 He has served as secretary general of MUSUHUM NGO whose mission is to plan and implement public health-based humanitarian interventions with a focus on reducing gender-based disparities and promoting education and health for girls. He currently supervises three humanitarian dispensaries in Niger and Benin held by MUSUHUM.

### **Mirfin Mpundu**

Dr. Mirfin Mpundu is the Head of Action on Antibiotic Resistance (ReAct) Africa. ReAct Africa acts as a catalyst, advocating for and stimulating country, regional and global engagement on antibiotic resistance by collaborating with broad range of organizations, individuals and stakeholders. He is a member of several boards and technical working groups including the World Health Organization Strategic and Technical Advisory Group (STAG) on antimicrobial resistance. Mirfin is also the Executive Director of the Ecumenical Pharmaceutical Network (EPN). He is a Registered Clinical pharmacist and Public Health Specialist with 20+ years of proven experience in public health, pharmaceutical supply chain management, clinical management, logistics and regulatory pharmacy practice experience. Mirfin is passionate about the inclusion and participation of Church Health Facilities within the global health agenda including access to quality-assured medicines and its rational use.

### **Mirghani Yousif**

Prof. Mirghani Yousif, is a Professor in Pharmacy Practice, Faculty of Pharmacy, University of Gezira, Sudan. He is a former Dean of the Faculty of Pharmacy and Ex Dean of the College of Graduate Studies & Scientific Research, University of Gezira. He graduated in the Faculty of Pharmacy, University of Khartoum in 1980. He obtained his Master Degree (Pharmaceutical Microbiology) from the same university (1983) & his PhD (Pharmacoepidemiology) from the Faculty of Medicine, University of Gezira (1999). Prof. Mirghani has published many scientific works and supervised good number of Masters & PhD students in diversified fields of Pharmacy Practice Research, mainly in Medicines Use Investigations in large population.

### **Mirza Alas**

Ms. Mirza Alas Portillo is a program officer at the South Centre. She works on global public health issues as part of the Health, Intellectual Property and Biodiversity Program (HIPB). She obtained a Bachelor of Arts in Human Ecology from College of the Atlantic (Maine, USA) with a focus on development studies and anthropology. She then received a Master of Public Health (MPH) joint degree by the University of Copenhagen (Denmark) and the University of Sheffield (UK). She joined the South Centre in 2015 to provide research and policy advice to developing countries on antimicrobial resistance and access to medicines issues at the United Nations, World Health Organization (WHO), and the Food and Agriculture Organization (FAO). She also works in developing technical capacity building activities on antimicrobial resistance at the regional and national level.

### **Mohamed K. Ibrahim**

Mohamed K. Ibrahim is a 36 years old Kenyan citizen. He is a dedicated, multi- skilled healthcare professional with a diploma in Clinical Medicine and Surgery with 13 years working experience, having served in different capacities within the Government and private institutions. He is currently working as a clinical officer at the Kenya Ports Authority Clinics in Mombasa. He has previously served with Skyborne group of Hospitals in the Volatile Eastern part of the Democratic Republic of Congo for 5 years as a medical director. His role was to plan, implement, evaluate and report on programs that provide both immediate emergency relief and sustainable health development.

### **Monteiro Serifo**

Currently Director of the National of Public Health Laboratory.

Former Positions: Coordinator of the Laboratory Subcommittee of the Center for Emergency Health Operations (COES) , Chairperson of the Guinea-Bissau National Confinement Subcommittee of the Global Initiative for Poliomyelitis Eradication .Member of the Technical Committee of the Ministry of Health Public. Member of the National Committee for the Elimination of Lymphatic Filariasis

Coordinator of the Laboratory team in the work of "Lymphatic Filariasis Mapping" in Guinea-Bissau

Responsible for the Yellow Fever Laboratory Network / Measles of West African Epidemiological Block for Guinea-Bissau. Member of the integrated national supervision team of the Ministry of Health.

### **Moumouni Sambo Halimatou**

Dr. Moumouni Sambo Halimatou est née le 17 Mai 1978 au Niger et y vit toujours. Après l'obtention de son Doctorat d'Etat en pharmacie à l'université de Bamako en Novembre 2005, elle poursuivit ses études à la l'Université de Dakar. Elle fût jeune professionnelle de l'OOAS où elle eut la chance de parfaire son anglais. De retours au Niger, elle occupa plusieurs postes techniques et administratifs avant d'être promue au poste de Directrice National des laboratoires de Santé. Avec un DIU en Antibiotologie et AntibioGramme en Afrique subsaharienne, elle est fortement engagée dans la lutte contre la RAM.

### **Monique Wasunna**

Dr. Wasunna is the Director, Drugs for Neglected Diseases Initiative (DNDi) Africa Regional Office in Nairobi, Kenya. She is a physician, an infectious disease and tropical medicine specialist. She is the Founding Chairperson of the Leishmaniasis East Africa Platform (LEAP); a clinical research platform created by DNDi that brings together scientists and institutions in Eastern Africa to develop clinical trial capacity to deliver new treatment options for neglected patients. Dr. Wasunna's research interests are in ethics, neglected diseases with special focus on clinical trials where she was a principal investigator of several projects. She is well published in peer review journals.

### **Mpuma Kamanga**

Dr. Mpuma Kamanga currently serves as the Director Special Duties- Health systems advisor in the Ministry of Health in Zambia. He is a public health physician and health economist with over 18 years of experience in Health reforms, strategic policy development and planning, healthcare financing, health systems strengthening, hospital operations improvement and large-scale treatment program implementation. He has served as an advisor to governments across Africa in the development of public and private sector healthcare programs. Dr. Kamanga received his Medical Degree (MD) from the University of Zambia, and his Masters in Health Economics from the University of Cape Town.

### **Mounerou Salou**

Mounerou is an Associate Professor, Bacteriology-Virology in the Faculty of Health Sciences, University of Lomé, Head at medical lab at University Teaching Hospital Campus, Lomé Togo and Head of National Reference Center for HIV and STI of Togo. He is also the AMR focal point of Ministry of Health of Togo.

### **Muhindo Jeanne Bukeka**

Dr. Muhindo Jeanne Bukeka is the Head of Veterinary Products in National Drug Authority (NDA) - Uganda since February 2019 a position she had acted for one year.

She worked as a Drug Information Officer in Charge of Veterinary Pharmacovigilance, Clinical / Field trails from June 2008 to January 2019. Had worked in the Ministry of Agriculture Animal Industry and Fisheries under Kanungu District Local Government as a veterinary officer in-charge of Animal Health and Production from 2016 to 2017. Holds a Bachelors of Veterinary Medicine and a Masters of Veterinary Medicine from Makerere University Kampala Uganda which has boasted her strength in veterinary drugs regulation to protect animal and human health contributing to improved animal production and public health.

### **Ndinda Kusu**

Dr. Ndinda Kusu is the Country Project Director with the USAID-funded and MSH Implemented Medicines, Technologies, and Pharmaceutical Services (MTaPS) Program. She is an experienced public health, program management and health system strengthening specialist with over 20 years of experience working with public, private and faith based health sectors strengthening pharmaceutical systems to increase access to and use of medicines and health technologies. She has done immense work in health systems assessments, human and institutional capacity development; development and implementation of policies, guidelines, curricula and tools; training; implementing operational research and continuous professional development; supporting continuous quality improvement, promoting rational use and curbing antimicrobial resistance; and strengthening regulatory systems with enhanced focus on post marketing surveillance and pharmacovigilance (PV) to promote patient safety. Ndinda holds a Bachelor's degree in Pharmacy (Nairobi) and Masters' degrees in Clinical Pharmacy (Queens University of Belfast) and Public Health (University of Liverpool).

## Nurein Ishaq Shakuwe

Nurein Ishaq Shakuwe is a Kenyan registered community health nurse from the Kenya Ports Authority. He graduated at Muranga Medical Training College as a Kenya enrolled community health nurse in the year 2006. He was then admitted at Mombasa Medical Training College to undertake a diploma in Kenya registered community health nursing in the year March 2009 and graduated in the year 2012 December. He first served as a volunteer with WWF (World Wide Fund) at Mkokoni village in Lamu County for a period of 6 months in the year 2007. From the year 2007 to 2009, he worked with afya 2, with the ministry of health in Lamu. He was recruited by the Kenya Armed Forces in 2009 and underwent basic military training for 6 months. Upon graduation, he served with the disciplined forces for 2 years up to the year 2012. In May 2017, he joined the Kenya Ports Authority as a registered community health nurse.

## Oladipo Aboderin

Aaron O. Aboderin is a professor of Clinical Microbiology at the Obafemi Awolowo University, Ile-Ife, Nigeria. He is also a consultant clinical microbiologist at the Obafemi Awolowo University Teaching Hospitals Complex, Ile-Ife, Nigeria since 2000 where he also coordinates the residency training programme and the antimicrobial stewardship group. He provides leadership for Nigeria's national response on antimicrobial resistance through the Nigeria Center for Disease Control.

He is involved with teaching of a large number of students at undergraduate and graduate levels and training of resident doctors in clinical microbiology. Primary focus of his research is on epidemiology of enteric infections, healthcare-associated infections, antimicrobial resistance and antimicrobial stewardship. He has over 50 peer-reviewed journal articles.

## Olga Perovic

### Current positions

- Centre for Healthcare-Associated Infections, Antimicrobial Resistance and Mycoses at National Institute for Communicable Diseases, a division of NHLS
- Head- Antimicrobial Resistance Laboratory & Culture Collection
- Associate Professor, Faculty of Health Sciences, University of the Witwatersrand, Johannesburg, South Africa.
- Head of WHO Collaborating Centre for AMR in AFRO region since 2017
- Honorary Research Fellow at University of Kwazulu-Natal
- Scope of activities:

Antimicrobial Resistance (AMR) lead in South Africa,

Principal investigator of national surveillance for antimicrobial resistance for nosocomial pathogens at GERMS-SA,

Expert in laboratory reference activities for resistance and antimicrobial susceptibility testing methods and their clinical applications;

Teaching and training of undergraduate, postgraduate and other related learners.

Publication in peer-reviewed journals and supervision of masters and PhD students

### Professional Memberships:

- Member of Global Antibiotic Resistance Partnership (GARP), South Africa since 2010.
- Past member of Strategic and Technical Advisory Group on AMR at WHO, since 2013.
- Member of Global Antimicrobial Resistance Surveillance System (GLASS), WHO since 2013.
- Chair of National Advisory Committee for Antimicrobial at South African Society of Clinical Microbiology (SASCM) since 2013.
- Member Strategic Advisory Group of Experts on In vitro Diagnostics (SAGE IVD) WHO since 2017.

### **Palmelia Etienne**

Palmelia Etienne epse Mbigha is a determined, hardworking, creative, honest and enthusiastic female. She is a state-registered nurse with a state Diploma in Reproductive Health. She has a work experience of seventeen years. She is presently a Nurse Manager with the Presbyterian Health Services with managerial duties and assisting with consultations and supervisory roles. She has been part of the healthcare team in the United Kingdom, an instructor for ALSO Cameroon, and an instructor for Neonatal Care Course - Advanced Life Support Group ( Resuscitation Council UK). She plays a great role in capacity building, skills acquisition, documentation, reporting incidents while maintaining confidentiality.

### **Paul Sitwala**

Paul is a veterinarian working for the Directorate of Veterinary Services that falls under Department of Agriculture Production in the Ministry of Agriculture, Water and Forestry, Namibia. He holds a Bachelor of Veterinary Medicine (University of Zambia) Bachelor of Science in Agriculture- Animal Sciences (University of Namibia). He has worked for the Namibian government for 6 years and currently in charge of Medicines Control and Advisory Services. His areas of interest is on Preventive Medicine.

### **Peter Yeboah**

Peter Yeboah is the Chairman of Africa Christian Health Association Platform (ACHAP), which is a network of 41 Christian Health Associations and Health Organizations based in 32 sub-Saharan African countries. Peter is also the Executive Director of the Christian Health Association of Ghana (CHAG), which is the largest private-not- for profit and non-state health service provider in Ghana.
