

## **Developing National Ecosystems for South-South and Triangular Cooperation to Achieve Agenda 2030 for Sustainable Development**

Jointly organized by the Islamic Development Bank, the South Centre and the UN Office for South-South Cooperation

26 September 2019, 11:00am – 1:00pm

UN Office for South-South Cooperation Headquarters  
304 East 45th Street, FF-1120  
New York, USA

### [Information about the Event](#)

Developing countries undertake South-South and Triangular Cooperation (SSTrC) in different ways, using various approaches, institutional arrangements, and methodologies. The increasing complexity and sophistication as well as the substantial scale of SSTrC call for improved and effective institutional arrangements. Based on field experience and analytical work, the Islamic Development Bank (IsDB), together with its member countries, the South Centre and the UN Office for South-South Cooperation have identified the main pillars of an effective national institutional framework—or a “national ecosystem”—for SSTrC.

The event will provide an opportunity to present the IsDB’s concept on national ecosystems for SSTrC and how it contributes to achieving Agenda 2030 for Sustainable Development and launch its publication entitled “Developing National Ecosystems for South-South and Triangular Cooperation for Achieving Agenda 2030 for Sustainable Development”.

This event is intended for Permanent Representatives to the United Nations, policy-makers from the countries of the Global South, representatives of development partners and development professionals.
