

PERMANENT MISSION OF THE REPUBLIC OF
UGANDA TO THE UNITED NATIONS

Breakfast Meeting:
The Future of Antimicrobial Resistance Response in Developing Countries
*** For Group of 77 and China delegations and capital officials**
New York, September 25, 2024

PROGRAMME

Time	Session	Speakers/Participants
8:30-8:45	Breakfast and networking	
8:45-9:00	Welcome/Opening remarks	Representative from the South Centre Representative from the Ministry of Health of Uganda
9:00-9:10	Catalysing Policy Action to Address AMR: Next Steps for Global Governance – presentation of key take aways of a research paper commissioned by the South Centre	Prof. Anthony So, John Hopkins University, former co-convener of the UN Interagency Coordination Group on Antimicrobial Resistance
Roundtable discussion: A moderator will guide an open discussion based on a list of questions. A summary report will be made to gather reflections and recommendations, which will be provided after the meeting to all participants.		
9:10 - 10:00	Did the process and outcome of the Declaration of the High Level Meeting on AMR allow the inputs of the Group of 77 and China to be adequately reflected? What are development challenges that arise from AMR in the connections across human health, animal health, food production and the role of the environment? What kind of support is needed to tackle these development challenges?	Representatives of Missions of the G77 and China to the United Nations in New York Capital based officials of the G77 and China Moderated by expert from the South Centre

	<p>What are the key obstacles to progress on AMR in your country?</p> <p>How are decisions made on prioritizing interventions and resource allocation on AMR at country level?</p> <p>How should progress on AMR be measured?</p> <p>Should countries establish targets/indicators against their own priorities and ambitions while linked to broader global commitments?</p>	<p>- Dr. Viviana Munoz, Health Programme</p>
