

## **Statement by the South Centre to the Seventy-eighth World Health Assembly**

### **Agenda Item 13.9: Global strategy for Women's, Children's and Adolescents' Health**

We support the implementation of the Global Strategy 2016 - 2030, with increased and sustained financing, towards meeting the health needs and realizing the rights of all women, children and adolescents.

Key interventions include expanding immunization coverage, promoting breastfeeding, improving nutrition, advancing gender equality, and advancing sexual and reproductive health information and services for women and adolescents.

We strongly support the resolution regulating the digital marketing of breast-milk substitutes.
